About This Content

The FPV Air 2 Track Builder enables you to quickly and easily get your track designs into the sim. Get practicing custom layouts as fast as possible!

With a unique and intuitive interface design, dropping in gates won't need to distract from time spent flying.

- Build and practice race event tracks before competing in real-life races
- Keep your skill dynamic by practicing an unlimited number of new lines, as many as you care to build!
- Intuitive user interface for rapid track construction
- Online track sharing

When you host a custom built track online, others with the DLC will be able to download that track from you, so you can freely and easily share, fly and modify each other's tracks.

Amazing game. Fun game if you can find anyone to play with, and if you do find a couple of people (usually the same 2) they are hacking pieces of shit that will not allow this game to be anything more than it is now. First game player was speed hacking and aimbotting. Second game blatant aimbotter. Spawn die Spawn die, spawn die, etc. One shooting with a pistol from other side of the map. Not even worth the less than \$1.00 price tag because of this. Add an anticheat to the game and I will try again. Other than that I would say this game is dead in the water.. Note: This game been tried out and reviewed in Steam offline mode or on Consoles.

Monday Night Combat is a multiplayer shooter game that incorporates shooter mechanics, tactical tower defense mechanics, and fun mechanics into one package. So did this bizarre mix of mechanics work to the game's benefit or did it just end up being too much for one little game to take in.

Monday Night Combat may be a small game, but it was able to take in a deep breath and work the air through its system smoothly allowing for an entirely new take on multiplayer shooters.

Overall: Monday Night Combat is an enjoyable and unique multiplayer shooter that incorporates a whole lot of different mechanics into a little game. The end result is an engrossing and highly addictive experience that makes it all the worthwhile to explore the depths of indie multiplayer games.. I like games with a retro feeling, though I do not play originals because I think they were great at their time but fall back compared with modern retro games. Biodrone Battle took my interest because Paradroid was one of my favorite games and I think this is a nice remake. It is faster, got more action (as far as I remember) but also has its moments of tension when you got chased by a droid, escape into another room, hide and watch your confused hunter. Graphics is somewhat basic or retro-like but lights and explosions give a tense ambience.. A nice casual game.. Guys this game is completely online and there are no player on steam. If you buy it you can just practice on your own. There is even no single player mode !. Amazing 9/10

Until i found this was an asset flip of Speedbox game

4/10

Also the controls are wonky

2/10

and all your controlling is a bland unity cube

1/10

I know because i use unity.

DONT BUY!!

if you sent me the project i could make it look better but not fix the controls.. Pretty good adaption of the main game. However, I would only recommend if you're going to be playing with friends online. The servers are empty otherwise, and while I haven't played the "Story mode", I can't imagine it being much fun on top of there not being really any incentives.

Cute, chill game about donuts, friendships, and maybe mild revenge. 10/10, will play when I'm sad for a good mood boost with trash pandas.. What can I say about this game.

First of all, I really enjoyed the time that I spent playing this game.

The story is good along the different chapters, but I was a bit disappointed about the final. But in general was a good game.. Saw I had a rare achieve for unlocking 30+ characters in this game back in 2012. Must have unlocked Gandalf cause I have no memory of this game. Neat.. When the game launched, I knew it was unfinished. I knew updates were coming. I decided, I love Street Fighter and I know it'll be worth the cover price in a year.

It's been a year.

Street Fighter 5 sucks.

No Arcade Mode. No sign one is coming.
Survival sucks. They haven't fixed it aer a year, so I guess that's how they want it.
In-game currency is exponentially too slow to acquire (you'd need 2000 online wins to buy a character @50FM per win and 100,000FM per character).
Promised "Daily challenges" are actually weekly.
Promised "Extra Battle Mode" is MIA.
The netcode is a step back from 4.
Remember that time they gave us all a rootkit?
Akuma is a lion now.

I'm uninstalling, leaving my "Do Not Recommend" and moving on with my life.
I will avoid doing business with Capcom for the foreseeable future.. A lot of the grind has been fixed and i highly rate this game. I can't seem to do anything on this program and everything is going\u2665\u2665\u2665\u2665\u2665up as I can't potition anything right on the freehand mode aswell as there is no crop to crop images and you can't add anything from outside the program, I'm sorry but its a no from me, Also for me it crashes when I try to preview an animated piece. I wouldn't recommend wasting your money on this program. To be honest I'd like a refund. This game is a truly original work of art in an age of pastiche content and deceptive marketing. The developer has only completed the beginning of the story, which takes about an hour to play through, but it already has the makings of a great game. If you were waiting for Steam to give you something new and interesting, or maybe you remember the times when games were not designed by "borrowing" pieces of existing games and pasting them together, play LAND OF LAMIA.. Gekyume
go crazy ahhhh go stupid ahhh
